Track scoreboards:

Single sided timing scoreboard 8x15

Included: Scoreboard, tripod, rechargeable battery, battery charger and remote control.

For a small and easy to handle timing display you can choose for our LED 8 digits model of 15 cm scoreboard, with its standard "rectangular" design, including tripod and remote control.

Small timing display LED boards

Included: Scoreboard, support bars, LED scoreboard manager software, power supply and remote control.

With LED timing displays you can give extra information to the athletes and public. You can place them wherever you want on the track. A small program is added to the MF software and will automatically run in the background.

TTC463

P10 LED board single colour (128x48 pix) (W128xH78xD6cm)
Display size: W128cm x H48cm

Large timing display LED boards

Included: Scoreboard, support bars, LED scoreboard manager software and power supply.

- Small depth: 6cm
- Display size = 128x80cm, total board height = 115cm
- Different setups possible
 - One board: "low cost" timing board
 - Two boards: in "V"-shape, or double sided.
 - Three boards: triangular shape, for display in ALL (360 degrees) directions

TTC466

P10 LED board colour (128x80 pix) (W128xH115xD6cm)
Display size: W128cm x H80cm

Triple-sided Lap Counter

Included: Scoreboard, pole, foot, rechargeable battery, battery charger and remote control.

Used to show the number of remaining laps to the audience and the participating athletes or cyclists. A manually operated bell is used for some sports to indicate the participants that the last lap is initiated.

TTC415

Field scoreboards:

Countdown scoreboard

Included: Scoreboard, tripod, rechargeable battery, battery charger and remote control.

To display the remaining time in athletic field events (countdown), or to show an up counting time during races or training events with only 3 digits (H:MM or M:SS or S:hh).

The LED scoreboard shows **red** digits.

WindSpeed scoreboard

Included: Scoreboard, tripod, rechargeable battery, battery charger and remote control.

This 3-digit WindSpeed scoreboard model shows you the wind measurement of your WindSpeed system. It is simply connected to the WindSpeed apparatus by means of a serial cable which is part of every new MacFinish photofinish delivery.

The LED WindSpeed scoreboards show the result of the measurement in **red** digits.

Small field event LED boards

Included: Scoreboard, support bars, LED scoreboard manager software, power supply and remote control.

The most attractive solution are of course our triple sided LED field scoreboards. As a good alternative you can use for the field events a small LED board. This board will display participants and results of field events in 1 direction. Of course you can put 2 LED boards in a "V" shape or 3 LED boards in a triangular shape to display the field result to the public.

TTC463 P10 LED board single colour (128x48 pix) (W128xH78xD6cm)
Display size: W128cm x H48cm

TTC481 Optional event panels: set of 8 name panels
(long jump, triple jump, high jump, pole vault,
shot put, javelin, discus, hammer)
